

DETASULTRA®

solutions around the cable

CATALOG
2023

Detas SpA presents the **DetasUltra** division, established in 2019 after many years of experience in cable management for electrical cabinets and equipment.

The **DES (Detas Entry System)** solution is designed to simplify the use of cables in electrical equipment, improving watertightness, strain relief and EMC, whilst minimising costs.

DES has been designed, developed and patented in Italy, thanks to our technical skills in the thermoplastic industry and production equipment.

Our attention to detail has driven us to develop innovative and reliable solutions for our customers at a competitive price.

For decades the Detas Group has been specialising in power electronics for sectors such as industrial automation, LED functional lighting, traffic safety and electric vehicle charging.

Entry system for cables with and without connectors

Splittable frame for cables with and without connectors

- ▶ Multiple configurations in the same frame
- ▶ Frame screws in AISI304 Stainless Steel
- ▶ IP66 and NEMA 4X* certified with all configurations of grommets
- ▶ Strain relief according to EN 62444
- ▶ Sturdy construction IK10
- ▶ Overmolded gasket acc. to UL94-V0
- ▶ ATEX version on request (see group 7)
- ▶ Threaded inserts version on request

---------------	------------	---

The DES 24 cable entry system consists of a splittable frame designed to accommodate small (SPP), multiple (X) or large (SPG) grommets for cables with and without connectors. The grommets can be freely positioned into the frame.

With all combinations of grommets, single, double, quadruple, big, the IP66 and NEMA 4X* are guaranteed.

The overmolded gasket guarantees faster installation times and the complete V0 self-extinguishing of the system.

Technical data

Material: PP+GF

The DES 380 splittable frame family includes the DES 380M and MX and is a modular solution for big size cables and corrugated pipes installations on electrical cabinets or machinery.

The system allows cable or corrugated pipes with diameter from 36 to 66 mm diameter to be secured in the cabinet entrance with fast and strain relief fixing.

The DES 380M is the base product for increasing the number of cables thanks to the modular capabilities of the 380 MX system.

Model	Code	Thread	Pcs /pack
SPP VENT G	1731020720	M12	10

SPP VENT is a pressure-compensating rubber seal, recommended for environments requiring uniform pressure.

The depressurising grommet is inserted into DES partitioned frames and thanks to its valve, compensates for the pressure of the environment and thus avoids temperature differences and consequent condensation.

The ventilation element has an M12x1.5 thread and can be removed to use threaded connectors and sensors.

 SPG PG	1731020745	17-33	10
 SPG PB	1731020748		10

The SPG P grommets are suitable for cables without connectors. They are used cutting the cone at the point corresponding to the diameter of the cable. The cable is then routed into the grommet where the internal shape is increasing the strain relief.

Is it also possible to secure the cable with a cable tie.

The DES PDM 24 is an innovative alternative to standard cable glands on electrical, electronic and telecommunication cabinets and equipment.

The cable is pushed through the front membrane, whilst the second membrane increases the strain relief and liquid resistance.

The DES PDM 24 CLEAN family is mainly used in the food&pharma production thanks to the rounded shape without edges which avoids dirt accumulation and allows frequent washing.

The cable entry plate can be fixed to the panel from the inside with four hidden screws or with snap fastening with four hooks.

The holes location is guided by a laser printing which guarantees the front clean area during the operation.

The first front membrane is lightly drilled with a small screwdriver, while the second parallel membrane acts as a reinforcement, ensuring a very high strain relief and water resistance.

GKD series intumescent gaskets are used with DES, DES 24M frames for fire protection according to EN1363-1 and EN45545-3.

They consist of a flexible, intumescent material that expands under pressure with thermal influence. In the event of a fire, foam forms and a solid, pressureresistant wall is created.

The SPG K are blind grommets which can be also used for cables without connectors with diameter from 16 to 30mm.

The SPG K0 can be perforated but the IP protection is not guaranteed.

Thanks to the double membrane in the SPG K1-K2-K3 grommets an optimal dust and water protection are achieved.

SPG K ATEX series can be used in zone 2 and 22 according to IEC 60079-10.
