

CABLE ENTRY SYSTEMS

detasultra.com

Detas SpA presents the **DetasUltra** division, established in 2019 after many years of experience in cable management for electrical cabinets and equipment.

The **DES (Detas Entry System)** solution is designed to simplify the use of cables in electrical equipment, improving watertightness, strain relief and EMC, whilst minimising costs.

DES has been designed, developed and patented in Italy, thanks to our technical skills in the thermoplastic industry and production equipment. Our attention to detail has driven us to develop innovative and reliable solutions for our customers at a competitive price.

For decades the Detas Group has been specialising in power electronics for sectors such as industrial automation, LED functional lighting, traffic safety and electric vehicle charging.

Entry system for cables with and without connectors

Splittable frame for cables with and without connectors

- ▶ Multiple configurations in the same frame
- ▶ Frame screws in AISI304 Stainless Steel
- ▶ Overmolded gasket for full UL94V0 system with grey or black grommets
- ▶ Strain relief according to EN 62444
- ▶ Sturdy construction IK10
- ▶ IP66 and Nema 4X certified with all configurations of grommets
- ▶ ATEX version on request (see sec. 7)
- ▶ Threaded inserts version on request

---------------	------------	---	----

The DES 24 cable entry system consists of a splittable frame designed to accommodate small (SPP), multiple (X) or large (SPG) grommets for cables with and without connectors. The grommets can be freely positioned into the frame. With all combinations of grommets, single, double, quadruple, big, the IP66 and Nema 4X are secured.

The overmolded gasket guarantees faster installation times and the complete V0 self-extinguishing of the system.

SPP VENT is a pressure-compensating rubber seal, recommended for environments requiring uniform pressure.

The depressurising grommet is inserted into DES partitioned frames and thanks to its valve, compensates for the pressure of the environment and thus avoids temperature differences and consequent condensation.

The ventilation element has an M12x1.5 thread and can be removed to use threaded connectors and sensors.

The DES PDM 24 CLEAN family is mainly used in the food&pharma production thanks to the rounded shape without edges which avoids dirt accumulation and allows frequent washing.

The cable entry plate can be fixed to the panel from the inside with four hidden screws or with snap fastening with four hooks.

The holes location is guided by a laser printing which guarantees the front clean area during the operation.

The first front membrane is lightly drilled with a small screwdriver, while the second parallel membrane acts as a reinforcement, ensuring a very high strain relief and water resistance.

The EMC grommets enable several cables from 2 to 35 mm diameter to be installed in the DES EMC splittable frame.

The 2X and 4X versions allow multiple cables in the same grommet.

Technical data

Material: TPE, EMI acrylic coating

Flammability: self-extinguishing acc. to UL94-V0

Temperature: -40°C... +110°C (static)

The SPG grommets are designed for cables with or without connectors or for corrugated pipes with diameter from 17 to 35mm.

Both grey and black colors guarantee the UL94V0 self-extinguishing.

SPG ATEX series can be used in zone 2 and 22 according to IEC 60079-10.

Technical data

Material: TPE

Flammability: self-extinguishing acc. to UL94-V0 (grey or black)

Temperature: -40°C... +110°C (static)

Features: halogens and silicones free

The SPG K are blind grommets which can be also used for cables without connectors with diameter from 16 to 30mm.

The SPG K0 can be perforated but the IP protection is not guaranteed.

Thanks to the double membrane in the SPG K1-K2-K3 grommets an optimal dust and water protection are achieved.

SPG K ATEX series can be used in zone 2 and 22 according to IEC 60079-10.
